

Automatic Waveform Plotting - Process Flow Chart

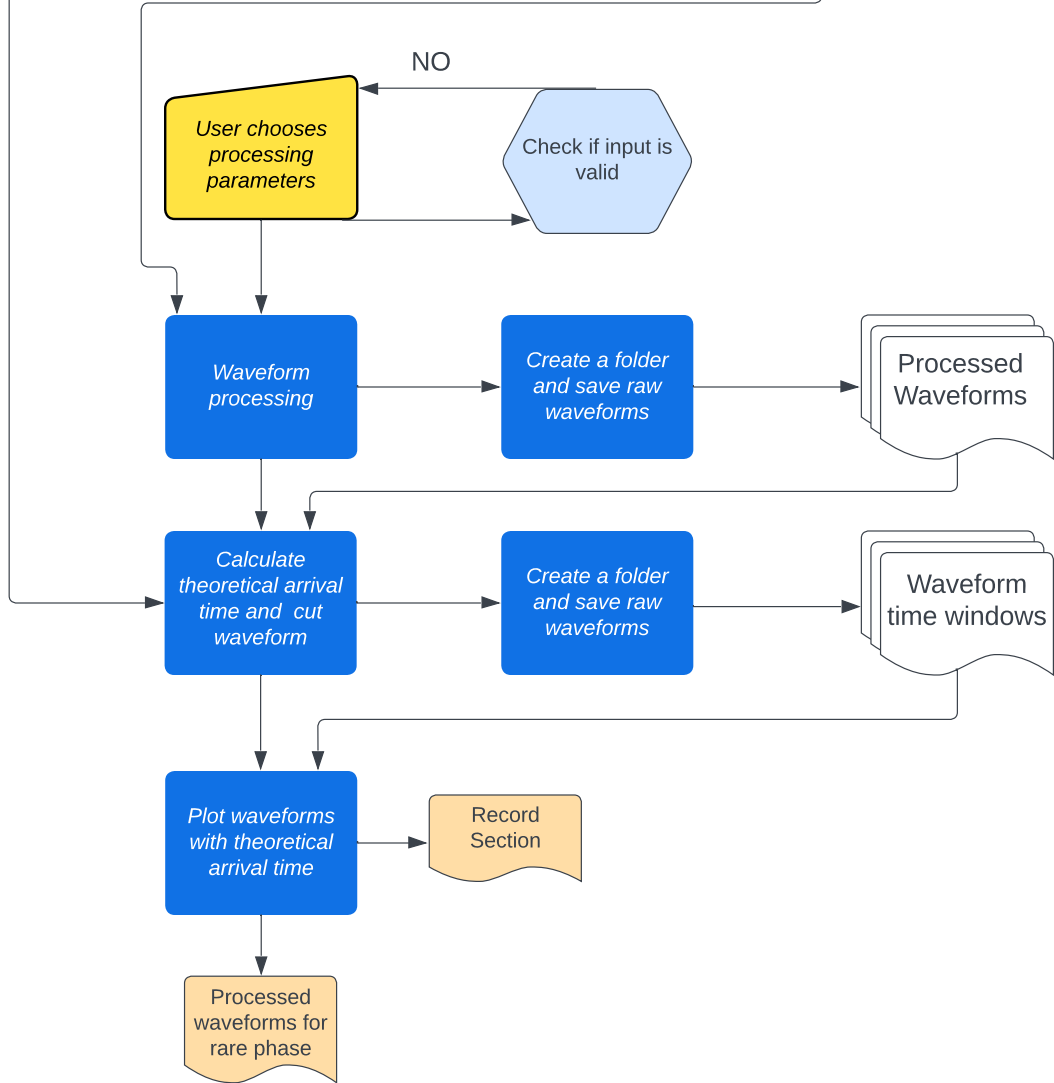

Danielle Kallenborn | May 22, 2023

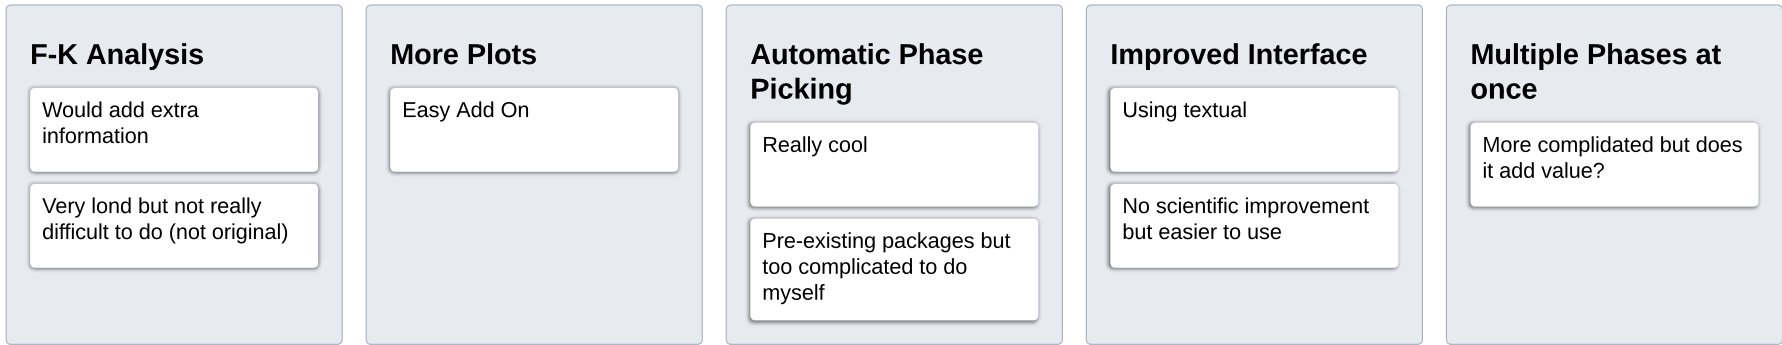

STAGE 1:  
Data  
Acquisition

STAGE 2:  
Data  
Processing

STAGE 3:  
Extras

Testing

- Choose one random station and run the whole code
- Check if data bases are still available
- Check if network connection is up and running
- Check if code flags up wrong inputs
- What happens if no data is available?
- What happens if data contains "empty stations"
